- 1.1 AW300-24-0115 released on February 1, 2010.
- 1.2 BD 100, AIPC - 24-31-05
- 1.3 BD 100, AIPC - 24-31-09

2.0 INTRODUCTION:

The complete revision of this Advisory Wire (AW) is to inform Operators that the proactive generator exchange campaign detailed in the Ref. 1.1 AW is being terminated.

3.0 DESCRIPTION:

In February 2010, generator P/N A3579-102 was introduced as a replacement for generator P/N A3579-101 (Ref. 1.2 and 1.3). Shortly thereafter, a proactive generator exchange campaign was introduced to offer Operators the opportunity to exchange any generator P/N A3579-101 that had between 2,000 and 3,000 hours' Time Since Installed (TSI) with the improved generator P/N A3579-102. Refer to Ref. 1.1 AW for the terms and conditions of the proposed exchange campaign.

Since the introduction, very few Operators participated in this proactive exchange campaign. Considering this, it was decided to terminate this offer.

4.0 ACTION:

There is no action for Operators to take other than being aware of the above mentioned changes. Any generator exchange that was requested prior the release of this AW revision will be accepted per the terms and conditions stated by the Ref. 1.1 AW.
